

**Presenting the latest developments in ID Reading and Motion Control Technologies:**

This one-day seminar will focus on newly introduced technologies from; **Cognex**, the leader in machine vision and traceability solutions and **Intelligent Actuator (IAI)**, world leader in linear electric actuators and low cost, high performance robots.

*We invite you to attend one, or both sessions as well as joining us for lunch.*

**ID Reading and Traceability Solutions: 9:00am - Noon**

**New ID technologies make it possible to read regardless of symbology, size, quality, printing method or surface:**

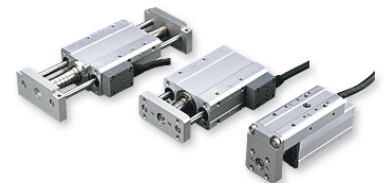

- ID Reader options and the advantages of Image-based ID technology
- Handheld industrial ID readers providing unmatched performance for barcode applications, where performance, ruggedness and mobility are essential.
- Cognex VSOC™ (Vision System on a Chip), provides unmatched barcode reading and ease of use not found in other image-based or laser systems available today!

**IAI New Product Introduction: 1:00pm - 4:00pm**

**Just some of the topics that we will cover:**

- PCON and ACON controllers are now available in EtherNet/IP-ready versions. International Standard Network allows high-speed communication with its peripheral devices via an Ethernet cable.
- IAI's straightforward programming language and pre-formatted products make it easy to integrate IAI products into your applications
- The new Mini ROBO Cylinders are available in the same shapes as air cylinders. Users who are comfortable with the handling and operation of air cylinder can switch to motorized cylinders effortlessly.

**Where: Boston Marriott Burlington**  
One Burlington Mall Road  
Burlington, MA 01803

**When: Tuesday, January 31, 2012**  
9:00 am - 4:00pm (FREE Lunch: Noon - 1:00pm)
